BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-113. (Canceled)

114. (New) A method of making a mascara comprising including in said mascara:

- (i) at least one inert filler;
- (ii) at least one polymer chosen from polymers of following formula (I):

in which n denotes a number of amide units, such that the number of ester groups represents from 10% to 50% of the total number of ester and amide groups; R¹ is, in each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R² independently represents, in each case, a C₄ to C₄₂ hydrocarbonaceous group, provided that 50% of the R² groups represent a C₃₀ to C₄₂ hydrocarbonaceous group; R³ independently represents, in each case, an organic group provided with at least 2 carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R⁴ independently represents, in each case, a hydrogen atom, a C₁ to C₁₀

alkyl group or a direct bond to R^3 or another R^4 , so that the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined by R^4-N-R^3 , with at least 50% of the R^4 groups representing a hydrogen atom;

- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

115. (New) The method of making a mascara according to claim 114, wherein the at least one inert filler is chosen from at least one of kaolin and PTFE.

116. (New) The method of making a mascara according to claim 114, further comprising including silica.

117. (New) The method of making a mascara according to claim 114, further comprising including at least one volatile solvent.

118. (New) The method of making a mascara according to claim 117, wherein said at least one volatile solvent is chosen from isododecane.

119. (New) The method of making a mascara according to claim 114, further comprising including at least one neutralizing agent.

120. (New) The method of making a mascara according to claim 114, further comprising including at least one vinylpyrrolidone polymer.

121. (New) The method of making a mascara according to claim 114, further comprising including a liquid fatty phase structured by said at least one polymer.

122. (New) A method of making a mascara comprising including in said mascara:

- (i) at least one inert filler;
- (ii) at least one polymer chosen from ethylenediamine/stearyl dimer tallate copolymer;
- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

123. (New) The method of making a mascara according to claim 122, wherein the at least one inert filler is chosen from at least one of kaolin and PTFE.

124. (New) The method of making a mascara according to claim 122, further comprising including silica.

125. (New) The method of making a mascara according to claim 122, further comprising including at least one volatile solvent.

126. (New) The method of making a mascara according to claim 125, wherein said at least one volatile solvent is chosen from isododecane.

127. (New) The method of making a mascara according to claim 122, further comprising including at least one neutralizing agent.

128. (New) The method of making a mascara according to claim 122, further comprising including at least one vinylpyrrolidone polymer.

129. (New) The method of making a mascara according to claim 122, further comprising including a liquid fatty phase structured by said at least one polymer.

130. (New) A method of making a mascara comprising mixing:

- (i) at least one inert filler;
- (ii) at least one polymer chosen from polymers of following formula (I):

in which n denotes a number of amide units, such that the number of ester groups represents from 10% to 50% of the total number of ester and amide groups; R^1 is, in each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R^2 independently represents, in each case, a C_4 to C_{42} hydrocarbonaceous group, provided that 50% of the R^2 groups represent a C_{30} to C_{42} hydrocarbonaceous group; R^3 independently represents, in each case, an organic group provided with at least 2 carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R^4 independently represents, in each case, a hydrogen atom, a C_1 to C_{10} alkyl group or a direct bond to R^3 or another R^4 , so that the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined by R^4-N-R^3 , with at least 50% of the R^4 groups representing a hydrogen atom;

- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

131. (New) The method of making a mascara according to claim 130, wherein the at least one inert filler is chosen from at least one of kaolin and PTFE.

132. (New) The method of making a mascara according to claim 130, further comprising mixing silica.

133. (New) The method of making a mascara according to claim 130, further comprising mixing at least one volatile solvent.

134. (New) The method of making a mascara according to claim 133, wherein said at least one volatile solvent is chosen from isododecane.

135. (New) The method of making a mascara according to claim 130, further comprising mixing at least one neutralizing agent.

136. (New) The method of making a mascara according to claim 130, further comprising mixing at least one vinylpyrrolidone polymer.

137. (New) The method of making a mascara according to claim 130, further comprising mixing a liquid fatty phase structured by said at least one polymer.

138. (New) A method of making a mascara comprising mixing:

- (i) at least one inert filler;
- (ii) at least one polymer chosen from ethylenediamine/stearyl dimer tallate copolymer;
- (iii) water;
- (iv) at least one coloring agent; and
- (v) at least one preservative.

139. (New) The method of making a mascara according to claim 138, wherein the at least one inert filler is chosen from at least one of kaolin and PTFE.

140. (New) The method of making a mascara according to claim 138, further comprising mixing silica.

141. (New) The method of making a mascara according to claim 138, further comprising mixing at least one volatile solvent.

142. (New) The method of making a mascara according to claim 141, wherein said at least one volatile solvent is chosen from isododecane.

143 (New) The method of making a mascara according to claim 138, further comprising mixing at least one neutralizing agent.

144. (New) The method of making a mascara according to claim 138, further comprising mixing at least one vinylpyrrolidone polymer.

145. (New) The method of making a mascara according to claim 138, further comprising mixing a liquid fatty phase structured by said at least one polymer.
